

# NUCLEAR SAFETY IS OUR NUMBER ONE PRIORITY

A powerful source of energy that provides base-load current without emitting CO<sub>2</sub>, nuclear power is one way to drive growth without contributing to global warming. EDF, the world's leading electricity company, gives priority to the safety of its facilities.

**73 reactors\***

in France and the UK.

Five in joint ownership in the USA.

**74.8%\***

of the electricity supply in France  
and 60 TWh generated in the UK

**3 EPR** under construction,  
two in China and one in France
