

# EDF – HYDRO PRODUCTION & ENGINEERING DIVISION: **A three-fold achievement**

## AN ENVIRONMENTAL ACHIEVEMENT

**Numerous exemplary initiatives in support of ecosystems:** Re-establishment of natural habitats on Kembs Island in order to restore ecosystems over about 1km<sup>2</sup> (biggest European project of its kind); lowering the Poutès Dam to support the local ecosystem; creation of an artificial river at Jons on the Rhone...

**Renowned environmental expertise:** Romanche-Gavet project, a model of sustainability as defined by the IHA protocol; Combe-Madame biodiversity compensation project, in response to a national call for proposals.

### TRIGGER FIGURES:

More than 200 fish passes

700 million cubic metres of water are made available by EDF every year to keep up river flows in low-water periods
