

EDF POWER NETWORKS LAB

LES RENARDIÈRES TESTING FACILITIES FOR CABLES AND ACCESSORIES

EDF Power Networks Lab is widely open to external customers. It consists of 75 experts, engineers and technicians who operate a full range of testing facilities for cables and accessories.

We offer:

- Large AC & DC testing facilities able to meet any requirements for qualification tests
- Standard type tests, pre-qualification tests and thermo-mechanical tests
- Support for development or investigation tests

You will benefit from:

- Our 50 year extensive experience in qualification tests
- Our deep knowledge of standards and operator specifications
- Our flexible accredited testing facilities and our staff's support

Want to know more about the dimensioning of underground cables? Eric Dorison's books are part of the EDF collection:
