

MAMZAR - DUBAI PROJECT (UNITED ARAB EMIRATES)

Bulk power transmission limits are becoming more & more easily achievable with the installation of cables in tunnels

- Construction of two ventilated cable tunnels of length 4 & 11.5 km (400 kV - 2x1500 MVA)
- Two cooling principles: natural or forced
- Construction of 400 kV substation in Mamzar
- Extension of Musriff 400 kV GIS substation
