

# PANOBLOC®

**Panobloc®** is a patented engineered construction system (9 patents).

A cross folded wooden panel consisting of several timber layers, filled in with insulating materials under an innovative industrial process (25 innovations).

**Panobloc®** is the leader of a new generation of industrial composite panels – wood & insulation – for the construction and rehabilitation of sustainable buildings.

**Panobloc®** reaches the market with a very high level of industrial pre-fabrication, providing unparalleled levels of performance, overpassing existing systems.

**Panobloc®** is the only wood based solution certified for buildings up to 15 floors.

The **Panobloc®** adventure is a pioneering approach in ecological and sustainable construction, serving the energy transition and the territorial development.
