

NUCLEAR POWER: COMPETITIVE, SAFE AND CARBON-FREE

The EDF Group is the world's no. 1 nuclear operator. Nuclear generation retains an important position in the energy mix. It provides continuous high capacity at a competitive cost and with no CO₂ emissions. This is a great advantage for both the security of the electricity system and climate protection. EDF has strengthened its expertise in industrial processes and achieved record winter availability in France.

No. 1 NUCLEAR OPERATOR
IN THE WORLD.

SHARE OF NUCLEAR POWER:
54% OF THE GROUP'S
INSTALLED CAPACITY.
