

NUCLEAR POWER

Energy transition

Continuous improvements to the flexibility of EDF's nuclear power plants are helping offset the variability in wind and solar power generation.

A 73-reactor fleet

The Group designs, builds, operates and maintains 73 reactors in France and the UK. It is exporting its expertise to other countries, China in particular.

Nuclear safety

Best practices identified by the International Atomic Energy Agency (IAEA).

RENEWABLES

Leading positions

Thanks to its fast-paced international expansion, EDF Energies Nouvelles has established leading positions in each of the countries in which it is present.

The Company is one of the top ten global players.

Investments

37% of the Group's gross development investments went to renewables in 2014.

Green bond

To finance future renewable energy projects, in November 2013 the EDF Group was the first large corporation to issue a green bond in euros.
