

THE MANIFESTO OF THE INTERNATIONAL DIVISION

EDF ambition

«EDF, the efficient and responsible electricity company, champion of low-carbon growth.»

Why does EDF need to expand abroad?

■ To seek growth where it can be found

We have to expand our presence in growing markets because the growth opportunity in our traditional home markets is limited.

■ To strengthen our skills and sharpen our competitiveness

We will strive to be at the forefront of innovation and we will challenge ourselves with the best market practices.

■ To diversify our risk

We have to reduce our dependency on the price of electricity in Continental Europe.

We provide the Group with a **consistent framework for development** while relying on our business-lines and our presence and strength in local markets.

We support the energy transition in all the countries where we are established and we contribute to implementing **profitable and sustainable growth with all the Group entities.**

What is the added value of the International Division?

Our core values and principles

We uphold the values and commitments of the EDF Group **Code of Ethics** wherever we operate. **Health and safety** are our priority and our principles are:

Business ethics

We always behave with equity, rigor and integrity.

Business focus

We focus on a limited number of projects and countries in order to use our resources as best as possible.

Accountability

We have an individual and collective duty to generate results with the financial resources with which we have been entrusted with by our shareholders.

Teamwork

We work for the success of others as much as our own, within the International Division and beyond with all the Group entities.

Winning spirit

We are innovative and bold, we strive to surpass ourselves and to turn a good idea into a successful project.
