

EDF GROUP PROJECT CRYSTAL

EDF and EnBW operate as co-investors in developing a storage of natural gas in salt caverns :

- Leasing gas storage cavities to IVG, owner of the site and related rights
- Building a gas plant in partnership with EnBW
- Developing a 60 km gas pipeline to connect the gas plant facilities to the Dutch market
- Possible connection to German grid in a further stage

The commercial operation on Dutch market is expected by winter 2011/2012
